

# Local Insight sharing best practice

2021

# Agenda

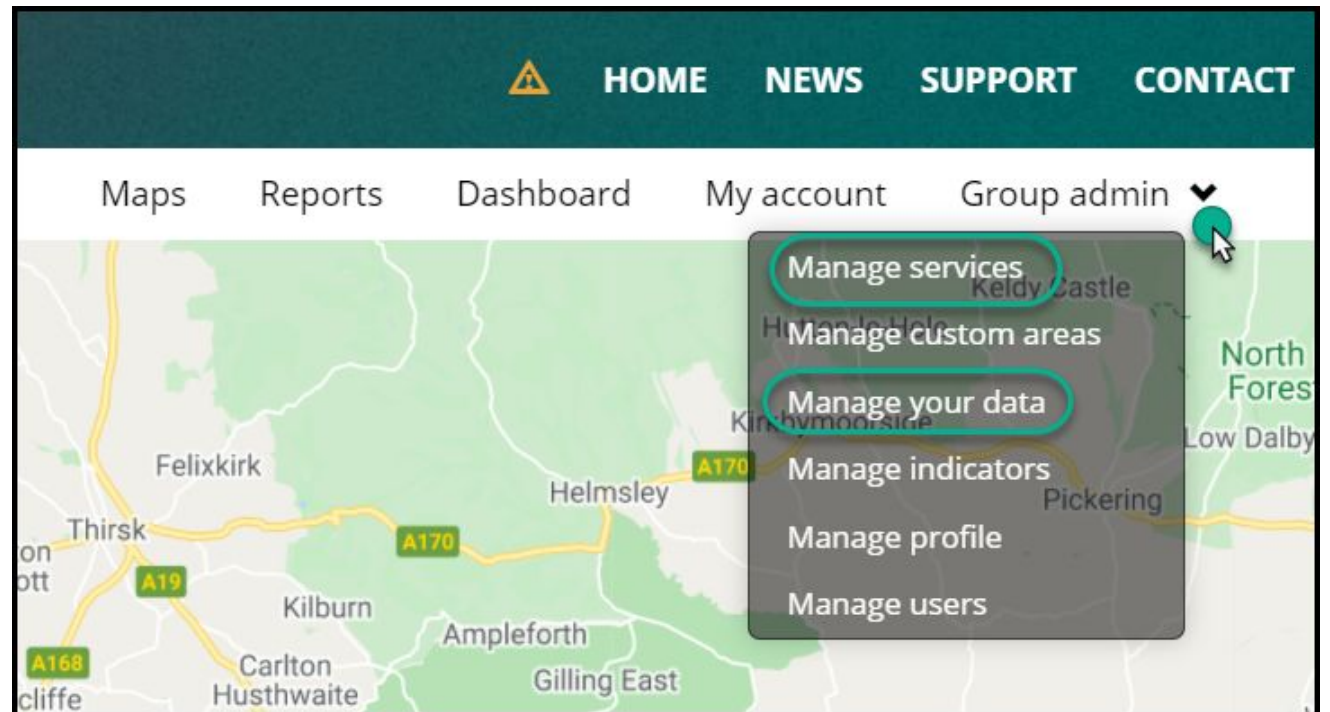

- Background - uploading data to Local Insight
- Breakout rooms

# Uploading data to Local Insight

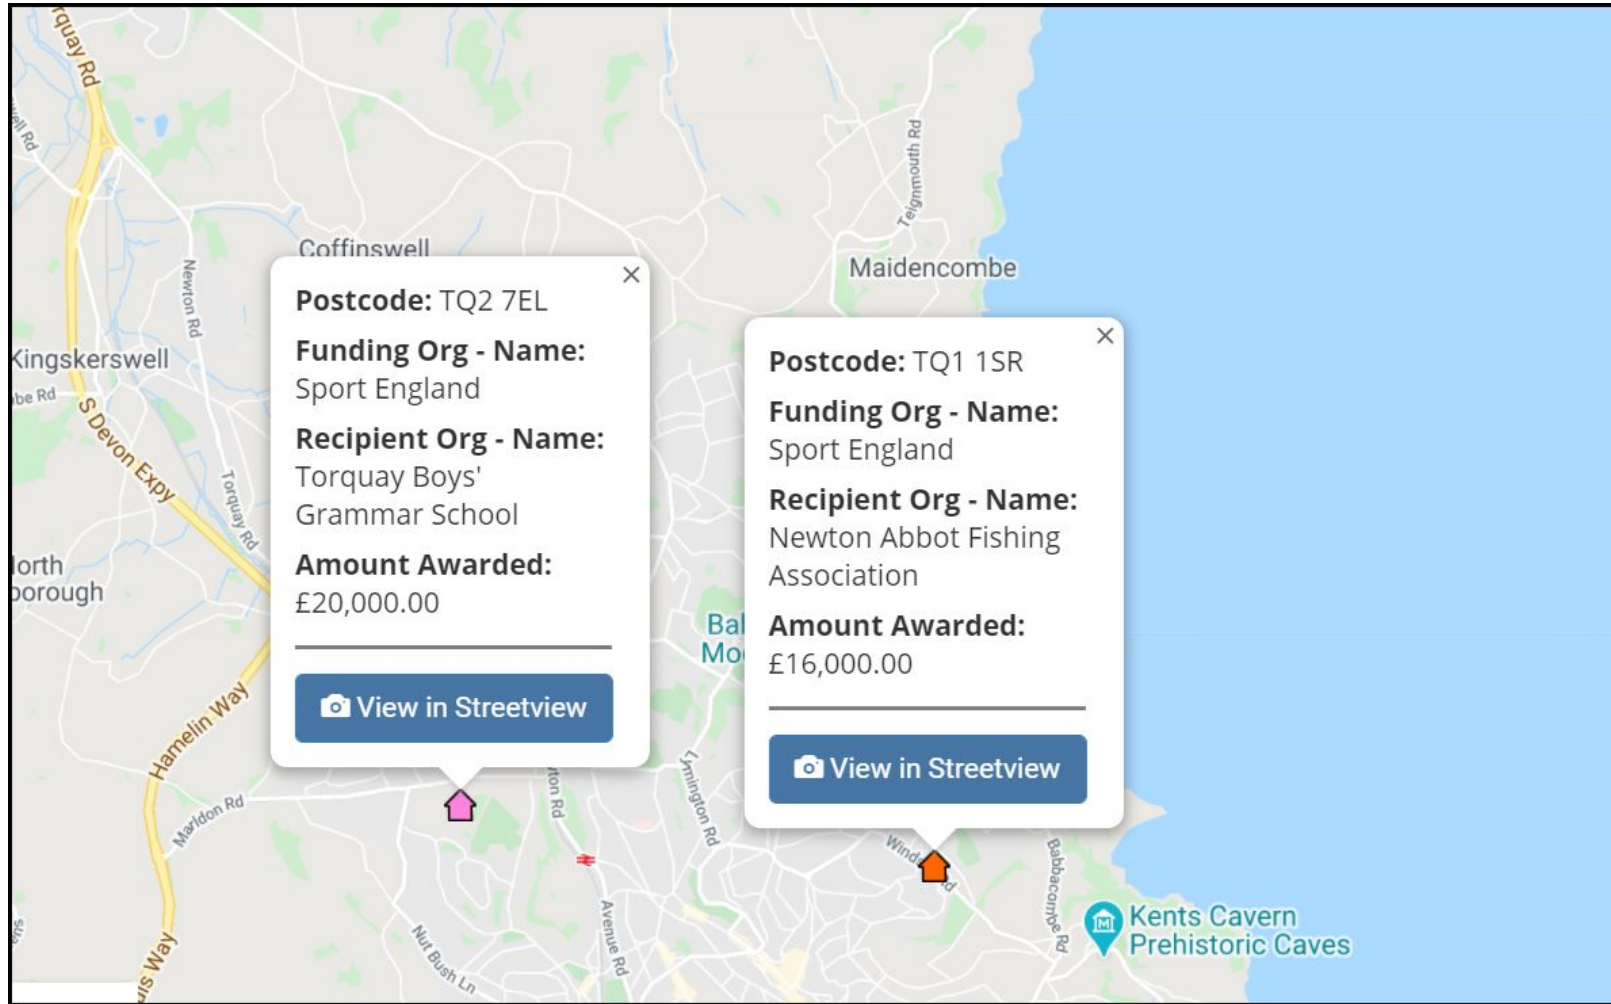

There are two features you can use to upload data to Local Insight

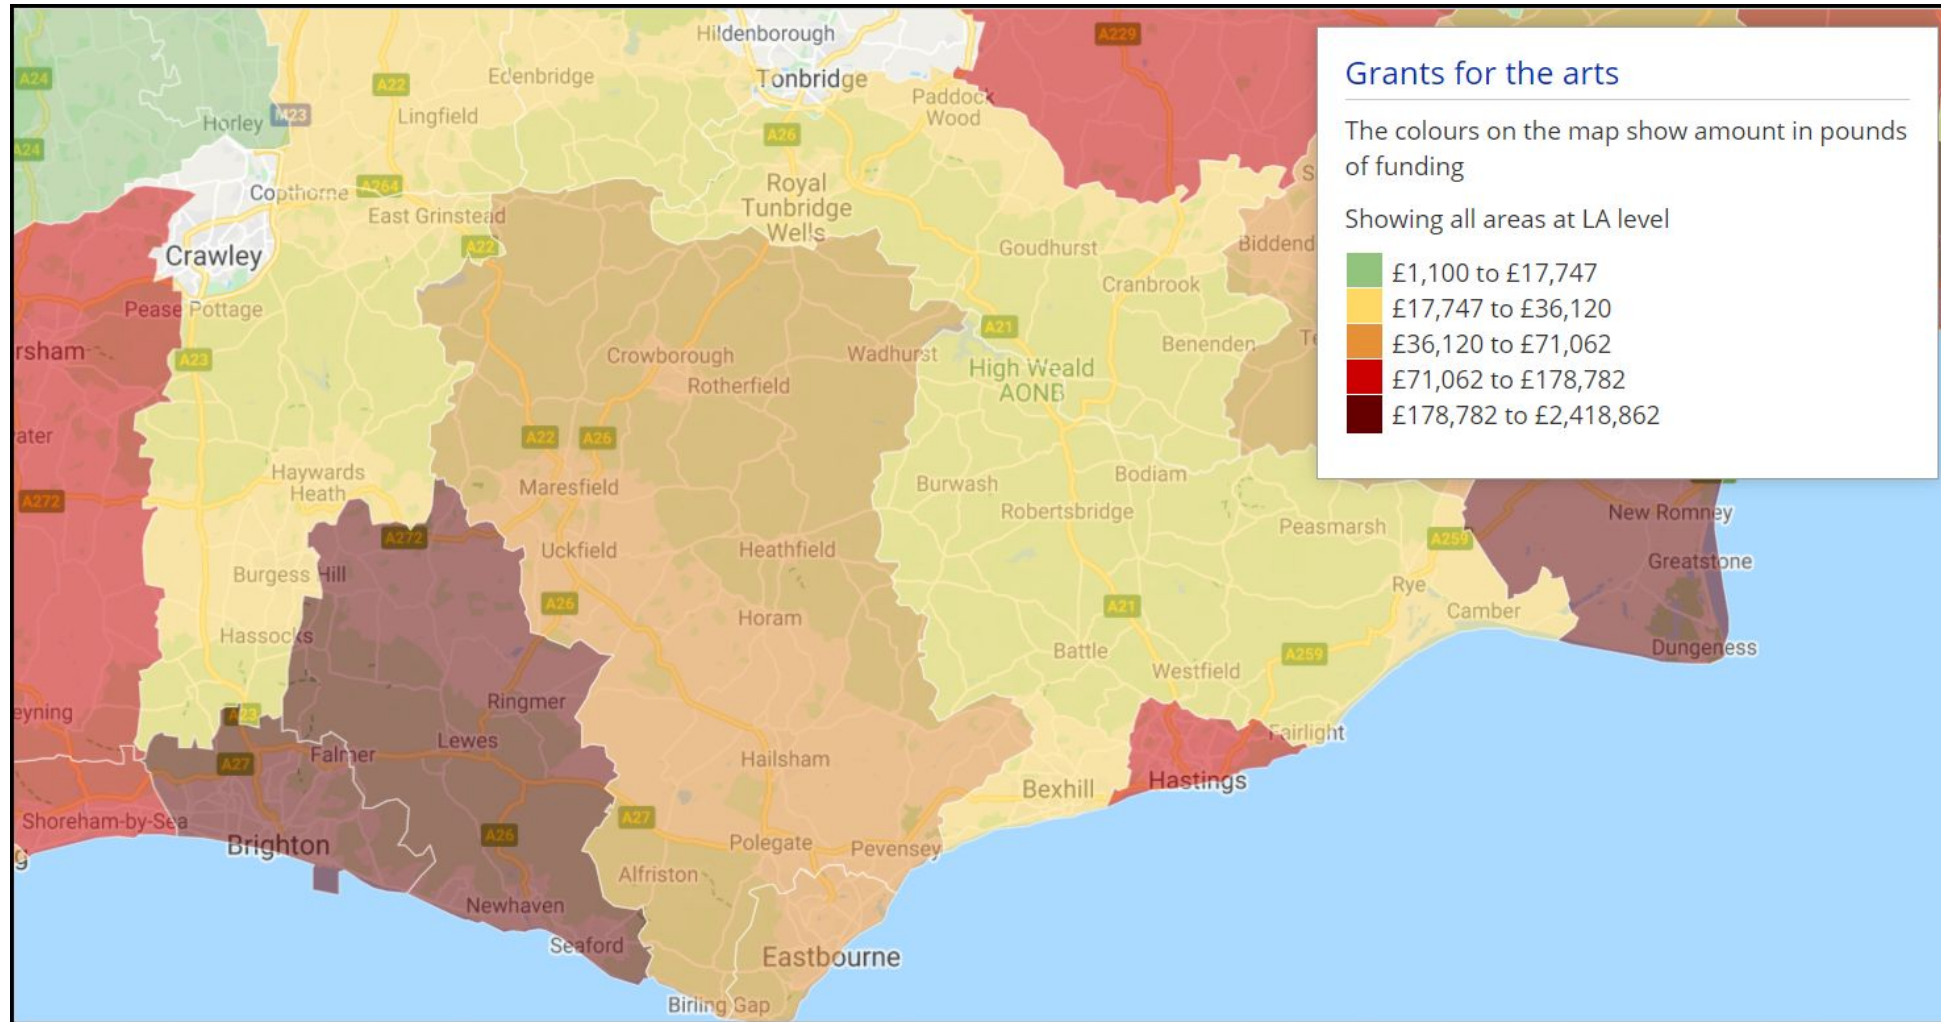

1. The **manage services** feature
2. The **manage your data** feature

# Manage your services

# Manage your data

# Manage your data

You can upload data published at any of the following geographies:

<b>Geographic Level</b>	<b>Code</b>
Postcode	BN33PE
Output Area	E00031178
Lower layer Super Output Area	E01000007
Middle layer Super Output Area	E02003666
Local Authority	00EY or E06000058

# Data resource

New resource in Data and Geographies section on the Help Centre

<https://ocsihelp.zendesk.com/hc/en-us/sections/360005791438-Open-Data-Resources>

# Example Local Authority level data

Data on Homelessness is only published at Local Authority level

Downloaded from

Uploaded to Local Insight - [Demo](#)

# Breakout sessions

Have you uploaded data using the services or manage your data features?

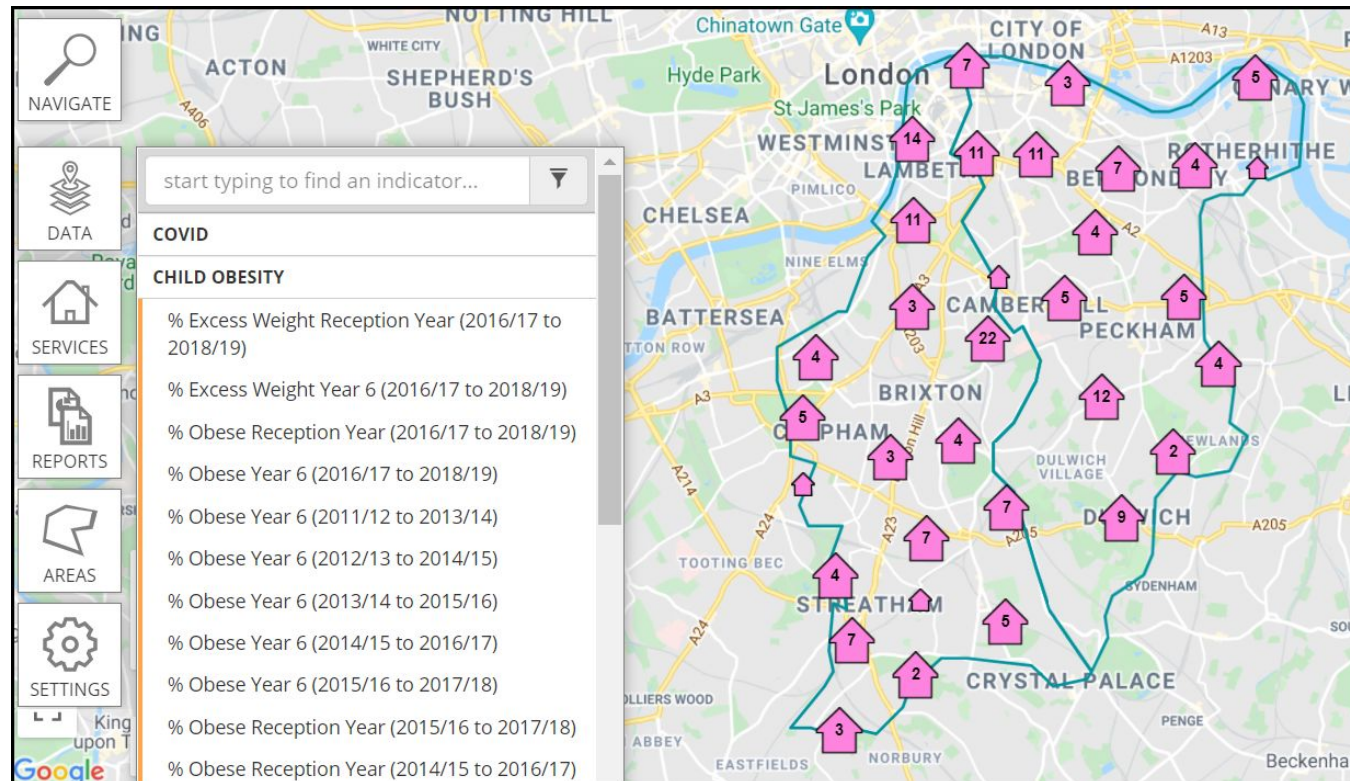

# Breakout session

1. What types of data have you uploaded to Local Insight?
2. Where did you source your data from?
3. How do you manage and update the data?
4. How did you use the data in Local Insight?

# Example | Guy's and St Thomas'

What types of data have you uploaded to Local Insight?  
Historical data for Childhood Obesity and location of schools

# Example | Guy's and St Thomas'

## Where do you source your data from?

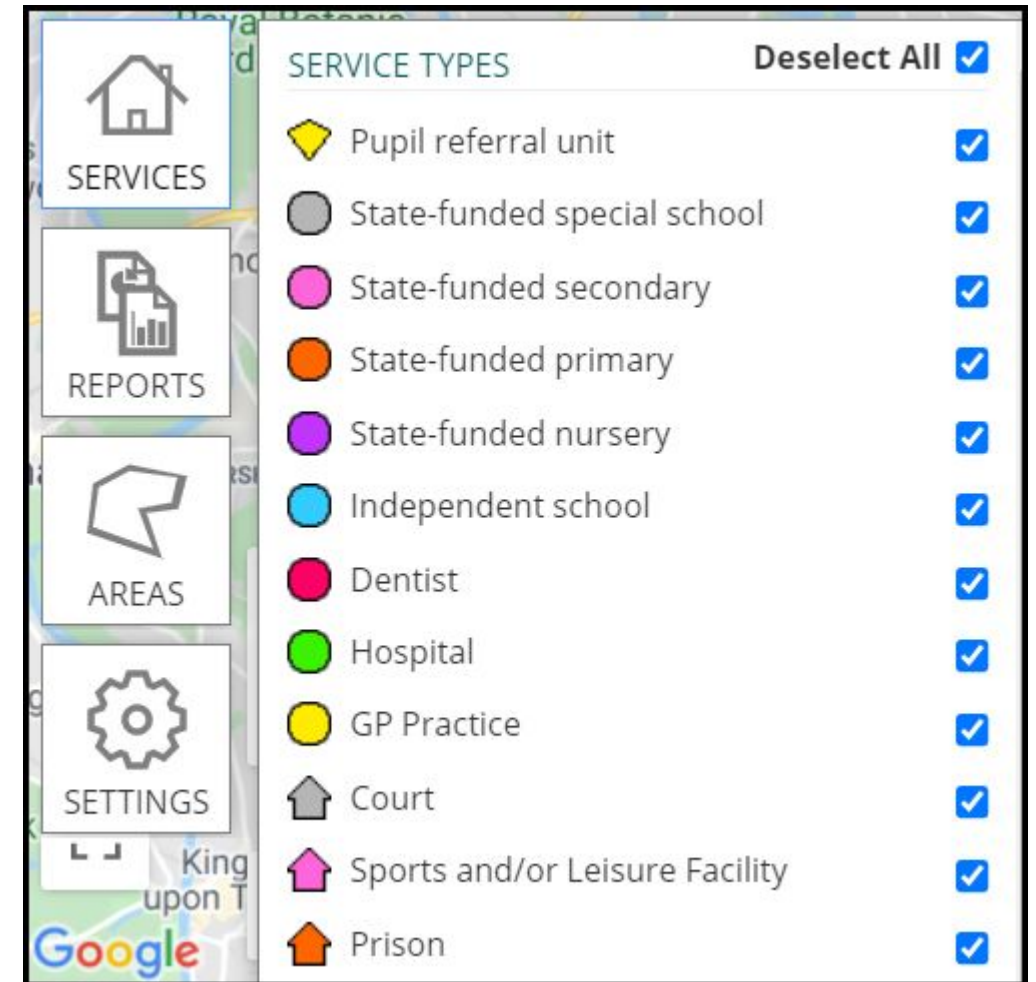

The Childhood Obesity data is from the same source used by Local Insight, the NCMP (National Child Measurement Programme) dataset. We then use the Manage your data tool to upload the historic data.

The service locations (schools, GPs, Care homes etc) we buy from Geolytix.

# Case Study | Guy's and St Thomas'

**How do you manage and update the data?**

We update the services as we get the update from the provider. Once a year usually.

# Case Study | Guy's and St Thomas'

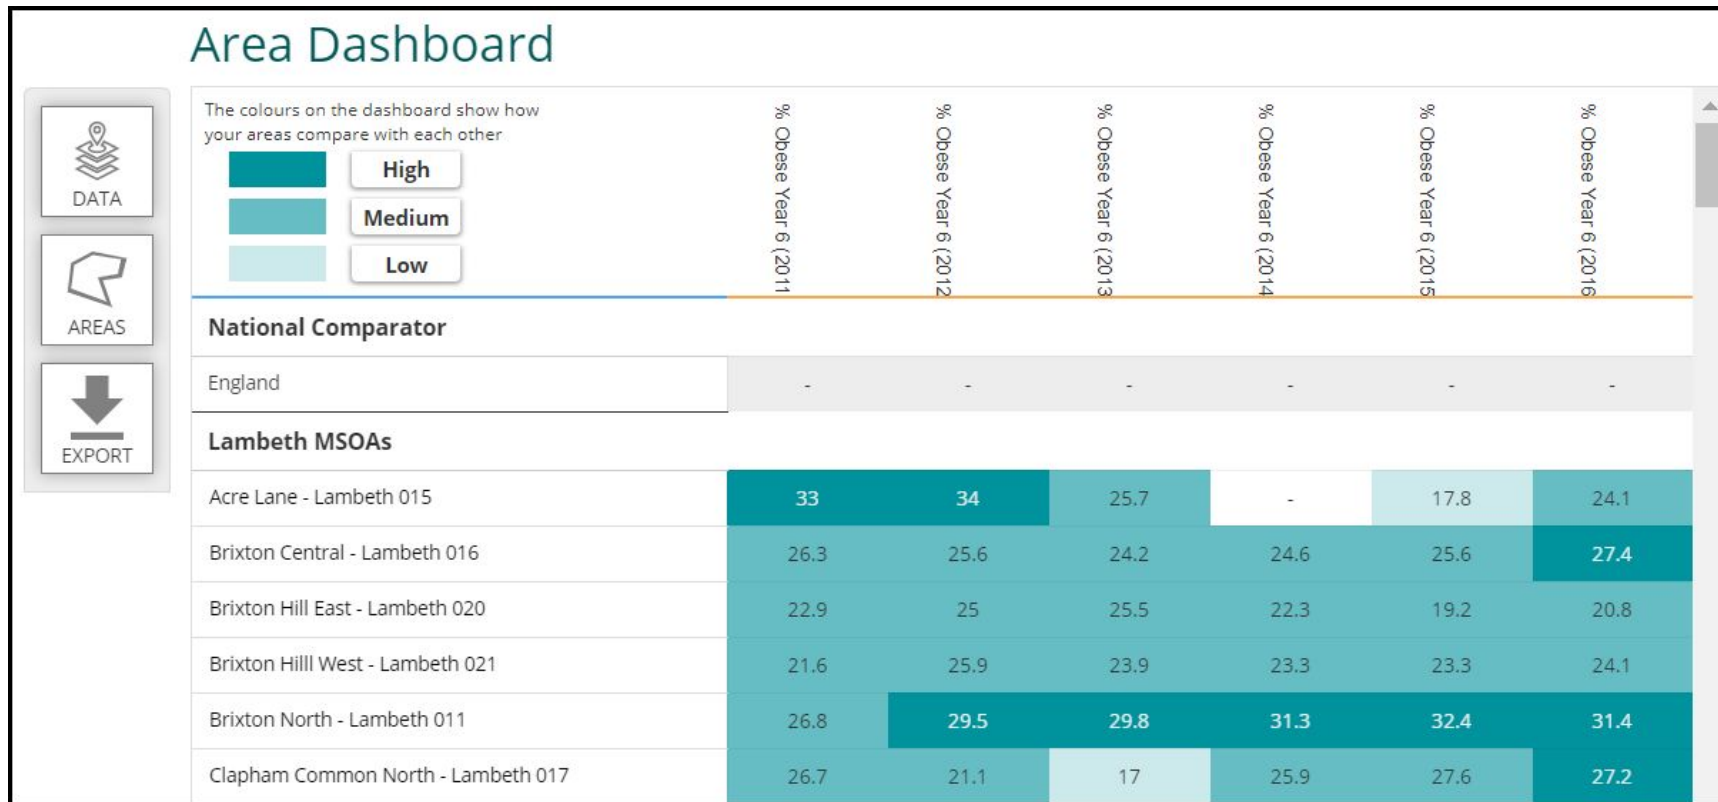

## How did you use the data in Local Insight?

Once we uploaded the historic childhood obesity data to Local Insight we then put the datasets on the Dashboard.

From there they can be exported with other indicators in a single CSV for all our custom areas which can be easily used for further analyses (i.e. in Tableau.)

# Case Study | Guy's and St Thomas'

# Breakout session

1. Any questions before we go into smaller groups
2. Assigning you now... (click **Join** breakout room)
3. There will be a Local Insight facilitator in each session

# Breakout session

1. What types of data have you uploaded to Local Insight?
2. Where did you source your data from?
3. How do you manage and update the data?
4. How did you use the data in Local Insight?

# More info

Examples of what you can upload to Local Insight..

# Upload data from Grantnav

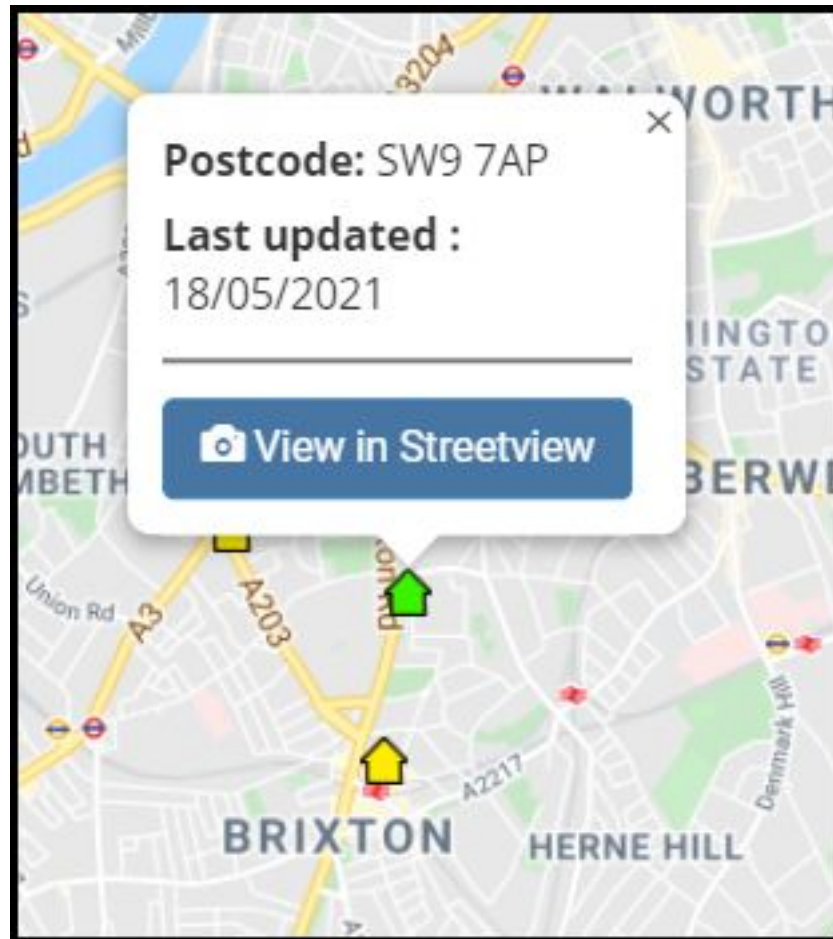

<https://grantnav.threesixtygiving.org/>

# Calculate your grant funding per head of the population
